Amí is  
here.  
It's about  
time.

\$299

# Amí is here and it's about time.

Up until now, producing professional looking documents hasn't been an easy task.

Typing in the words, selecting type-faces, manipulating columns and margins, aligning paragraphs, justifying lines, wrapping text and selecting and inserting graphics all seemed a little too difficult for the average PC user. It's hard enough doing basic letters and memos let alone the absolute nightmare that confronts you when reports, newsletters and presentations are required.

## But now there's Amí

Amí is a word processor that lets you produce beautiful looking documents in less than a quarter of

With Amí, you can be the creative director. You can create words and page layouts simultaneously as one intuitive train of thought. You'll do it all with an ease and speed you never realised was possible.

Amí includes quick and efficient keyboard commands (or you can use a mouse), 110,000 word Spelling Checker, Search and Replace, Cut, Copy, Paste, Headers and Footers, Undo as well as Context-sensitive Help. Amí even has the ability to import files from other word processors, and much more.

Amí lets you design your documents as you write, or you can enter your text quickly and then sort out your formatting later. If you don't feel like designing, don't worry. Amí comes

and letters to proposals and major reports. All you have to do is type in your words and let Amí do the rest.

As an introductory offer, Amí is a steal at only \$299.00. But Hurry! Amí is all about time and time is wasting. Min 640Kb, EGA, IBM 80286.
